Applicant(s)

YAMADA, YASUHISA

Examiner

Greg Binda

Art Unit

3679

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Drawings

1. Figure 7 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g).
2. The drawings are objected to because:
 - a. An inappropriate cross hatch pattern is used to depict rubber member 'f' shown in Fig. 7. See MPEP § 608.02 for the appropriate pattern.
 - b. Reference numeral 32 appears at page 17, line 19, but does not appear in the drawings.
 - c. Reference numeral 8 should appear in Fig. 6.
 - d. Reference character R appears at page 24, line 7, but does not appear in the drawings.
3. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an

Art Unit: 3679

application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

4. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Rabson, AU 234,387. Figs. 1 & 2 show a telescopic shaft for vehicle steering assembled in a steering shaft of a vehicle, comprising:

a male shaft 1 with accommodating portions 5;

Art Unit: 3679

a female shaft 2 with accommodating portions 4, the shafts incapable of relative rotation with regard to each other but mutually slidable; and

at least one set of one set of needle rollers 9 with tapered ends disposed in the accommodating portions.

7. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Castellon, US 6,557,433. Figs. 1-3 show a telescopic shaft for vehicle steering assembled in a steering shaft of a vehicle (see also col. 1, lines 8-10), comprising:

a male shaft 11 with accommodating portions 17;

a female shaft 10 with accommodating portions 13, the shafts incapable of relative rotation with regard to each other but mutually slidable; and

at least one set of one set of needle rollers 27 with tapered ends disposed in the accommodating portions.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Runkle, Daugherty, Zernickel, Fisher and SU 398786 each show a telescopic shaft. US 2006/018069 is a publication of what appears to be a related application.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Greg Binda whose telephone number is (571) 272-7077. The examiner can normally be reached on M-F 9:30 am to 7:00 pm with alternate Fridays off.
